

Bahr's Propane Gas and Air Conditioning celebrates 21st year

Bahr's Propane Gas and Air Conditioning, Inc., 4441 Allen Road, Zephyrhills, has been fulfilling customers' needs for 21 years.

Kevin Bahr and his brother, Leonard "Lenny" Bahr, founded the business in 1986.

Bahr's is a full service propane gas company and a full service air conditioning company employing 23 people.

The company is able to install pipes in houses and to install and service all types of propane appliances, including tank less water heaters, Kevin Bahr said.

On the air conditioning side, the company offers sales and service for both residential and commercial customers.

Both Bahr brothers have lived in Zephyrhills since 1969 when their parents moved here from New York.

Lenny Bahr originally established the propane business and began delivering propane to people in 1982. The air conditioning business and the propane business were joined together in 1986, Kevin Bahr said.

Bahr's Propane Gas and Air Conditioning, Inc., has been a family-owned and family-operated business from the start, Kevin Bahr said.

"We want to thank the community for its support, and we want to thank the community for all it has done for us," Kevin Bahr said.
